

RECARO

PREMIUM SEATS FOR PROFESSIONAL DRIVERS

The RECARO aftermarket seat range for commercial vehicles

BETTER BEHIND THE WHEEL WITH RECARO

Why retrofiting is worthwhile

At RECARO, humans are always at the center of product development. In our history spanning more than 100 years, our experience, expertise, and confidence have grown in regard to all aspects of mobile seating – which makes our products unique.

RECARO driver seats for trucks and buses are workplaces that meet the highest demands: They feature all the adjustment settings that allow each professional driver's individual needs to be met. Their innovative features make millions of kilometers at the wheel more comfortable and pleasant. RECARO commercial vehicle seats are uncompromisingly designed for endurance: They exceed statutory requirements in order to fulfill high standards of robustness and unwavering functionality. Moreover, they have set the bar at a new level in terms of value retention. This is quality that really pays off.

Ingenious Design makes RECARO seats distinctive and exceptional: As the result of the company's rich expertise and limitless passion for creating excellent seating, it stands for the combination of flawless ergonomics, sophisticated functionality, and dynamic, attractive aesthetics.

With our commercial vehicle seat range, we at RECARO have only one goal: making life behind the wheel more enjoyable for professional drivers.

Get on board and experience the difference.

QUALITY STEMMING FROM PASSION

Uncompromising comfort
and reliability

Only a safe and comfortable workplace is a good place to work – and this applies even more in the countless hours behind the wheel of a bus or truck. RECARO seats set new standards in both disciplines.

Our products for professional use have proven themselves to be extraordinarily robust and reliable in hard service life test cycles on some 1.5 million kilometers of road testing. Their exceptional resilience is no accident: It is ensured by the company's own in-house manufactured metal components, for example, which have proven themselves millions of times over in the automotive industry. Ground-breaking safety technology and intuitive safety features are an expression of our responsibility for occupant protection.

The extraordinary RECARO quality is also visible, tangible, and accessible: It is the culmination of elegant design, high-grade materials, masterful workmanship, and leading-edge manufacturing techniques. This unparalleled standard of quality extends to the service and support that RECARO provides its customers.

In terms of comfort, the new commercial vehicle seats from RECARO offer innovative features that make the working lives of professional drivers easier – particularly on long-haul routes, but also in short-haul use or even when navigating rough off-road terrain. Drivers are always seated with ergonomically correct – and therefore healthier – posture. This enhances their performance at the wheel and makes them less vulnerable to fatigue and musculoskeletal disorders. This is confirmed by the independent experts of the Campaign for Healthier Backs (AGR), which recognized our commercial vehicle seats as particularly back-friendly products by awarding them the world-renowned AGR Seal of Approval.

A WORLD-CLASS DRIVER SEAT

RECARO C 7000

It sets new standards as a premium product in the driver's cockpit of trucks and buses: The RECARO C 7000 meets the most demanding requirements for safety, ergonomics, functionality, durability, and comfort – and convinces with exclusive additional equipment details.

A perfect blend of design and ergonomics

The extraordinary appearance of the RECARO C 7000 enhances every professional workspace. High-grade materials, the brand's iconic build quality and intuitively easy-to-use adjustment elements illustrate the key emphasis RECARO puts on the comfort and durability of its products.

Highly individual and innovative

The RECARO C 7000 features a wide array of adjustment options that allow it to be tailored to each driver's individual needs. It also offers a range of innovative functions and features that make the working lives of professional drivers easier and more comfortable. For example, with a unique combination of adjustable pelvic and lumbar support, with adjustable side-bolsters on the seat cushion, and with a comfort release seat length adjustment. Further examples include a seat climate package that allows the simultaneous use of seat ventilation and heating,

and a blend of attractive leather and Aero 3D fabric, which also enables optimum climate control.

Safe and robust

You can count on the RECARO C 7000. This assurance is founded on RECARO's use of metal components manufactured in-house and proven millions of times over in the automotive industry, the highest safety standards, the toughest testing procedures, the latest manufacturing techniques, and practical experience based on a corporate history spanning more than 100 years.

Certified and recommended by Association Forum Healthy Back – Better Living and Federal Association of German Back Schools. More information: AGR e.V., Pf. 103, D-27443 Selsingen, Phone + 49 4284/92 69 990, www.agr-ev.de

COMFORT ON ANY ROUTE

RECARO C 6000

It's the seat that is ready for the high demands of everyday work: The RECARO C 6000 meets the expectations for a professional workstation for professional drivers. This seat fits in harmoniously in the modern driver's cockpit of buses and in the cab of a wide variety of trucks. It combines robust technology with maximum reliability and durability, top quality, and safety.

Reliable and individual

The RECARO C 6000 impressively handles the demands of everyday work. It supports the driver with numerous adjustment options, which allow it to fit individual needs. Its controls are intuitive and ergonomically positioned.

Especially on long trips, the seat makes working life for professional drivers more comfortable and enjoyable – with a unique combination of adjustable pelvic and lumbar support, for example, or a comfort release seat length adjustment.

Robust and safe

You can count on the RECARO C 6000. This assurance is founded on RECARO's use of metal components manufactured in-house and proven millions of times over in the automotive industry, the highest safety standards, the toughest testing procedures, the latest manufacturing techniques, and practical experience based on a corporate history spanning more than 100 years.

THE WAY TO YOUR RECARO SEAT

You are only a few steps away from your own personal RECARO seating experience. Take time for this – and start with some questions for yourself: What is most important to me when sitting in the vehicle? What should my RECARO seat be able to do? What should it look like? How much do I want to spend?

1

Step 1 – Information: Which RECARO seat fits me and my vehicle?

Find out about the current product range of commercial vehicle seats in this brochure, online at www.recaro-automotive.com, or at one of our authorized RECARO service partners (online under Dealer Search). In this way you can first find out what model your desired RECARO seat is and how it fits with your individual requirements.

2

Step 2 – Decision: How do I find my RECARO?

For a balanced decision, we recommend that you seek the personal advice of an authorized service partner. He can often respond to your individual ideas with very individual solutions. The opportunity to try out your desired model at length should round out your visit to the dealer.

You can obtain information about your desired seat online at www.recaro-automotive.com. To do this, click the Seat Finder under the Online Catalog menu item and select the brand of your vehicle. Then the model of your vehicle for which our RECARO seats are available will be displayed. By clicking the displayed vehicle model and one of the displayed seats, you will obtain detailed information about your seat.

Please note that special mounting kits (risers and car kits) are necessary for installation of RECARO seats in your vehicle. These ensure that your RECARO seat is perfectly connected to the vehicle – and that the legal requirements are met. To find the riser that matches your vehicle and the selected seat, refer to the price list, which is available for download as a PDF file under the menu item Commercial Vehicle Seats > Service. You can also go to the list under Commercial Vehicle Seats > Service > GOP or contact an authorized service partner. Be sure to also find out about technical requirements of your vehicle and any necessary entries in the vehicle registration.

3

Step 3 – Ordering: How do I order my RECARO?

Ideally, you order your RECARO seat directly from your authorized service partner. He will check your product selection, compare the technical requirements, and also take care of contacting RECARO to place an order for everything that is needed, including the vehicle-specific mounting kit. Your RECARO is then delivered to the service partner complete and ready for installation.

4

Step 4 – Installation: How does the seat get into my vehicle?

Have the installation of your RECARO seats carried out exclusively by a specially qualified and authorized service partner. Take some time to familiarize yourself with your new RECARO seat in your vehicle. Follow the advice of the RECARO Seat Tutorial on correct seat adjustment in your vehicle (page 11 in this brochure).

RECARO
MODULAR KIT

RECARO seat

RECARO riser incl. car kit

General Operating Permit (GOP) only in combination with the vehicle-specific mounting kit (riser and car kit)

We hope you enjoy your new RECARO seat as it accompanies you on many safe journeys!

SITTING RIGHT

Even the best ergonomically designed commercial vehicle seat can only do its job of supporting the driver if it has been properly adjusted. In doing so, the correct order of adjusting the seat to your particular body dimensions and comfort-related preferences is crucial. The image illustrates an optimally adjusted seat.

Step 4: Adjust the **seat** to an **angle** at which you can easily and fully depress the pedals with your legs remaining slightly bent. Your thighs should rest lightly on the seat cushion, without any pressure from the seat cushion's front edge being felt.

Step 5: Press your buttocks as firmly as possible against the backrest. Adjust the **backrest** to an **angle** at which you can fully grip the steering wheel with your arms slightly bent. When turning the steering wheel, your shoulders should maintain contact with the seatback.

Step 6: Adjust the **shoulder support** so that it optimally suits the natural S-curve of your spine. Your shoulders should contact the backrest without any exerted pressure.

Step 1: The **height** of the seat should be adjusted to ensure that you have an optimal view of all vehicle mirrors, displays and controls, while also being able to fully and effortlessly operate the pedals.

Step 2: Press your buttocks as firmly as possible against the backrest. Adjust the seat's **distance** from the pedals so that your legs remain slightly bent while fully depressing the pedals. You should also be able to fully grip the steering wheel with your arms slightly bent.

Step 3: Adjust the **seat-cushion length** so that your thighs extend slightly beyond the edge of the seat cushion. Rule of thumb: 2 to 3 fingers of space between the seat edge and the hollows of your knees.

Step 7: Adjust the **pelvic support** so that your pelvis is tilted slightly forward while sitting upright. Adjust the **lumbar support** so that the natural curvature of the lumbar portion of your spine is supported without any exerted pressure.

Step 8: The **side supports** should be adjusted close enough to your body that the sides of your torso are comfortably supported without any constriction.

The eight RECARO steps to correct seat adjustment are also available as a video on the RECARO Automotive Seating website at www.recaro-automotive.com/videos or on the RECARO YouTube Channel at <http://www.youtube.com/recaroadautomotive>.

Simply scan this QR Code to open the video on your smartphone and follow the presented steps right in your cab.
